

Remarks

In the Office communication dated September 15, 2004, a Notification of Drawing Inconsistency With Specification was received, wherein it was noted that Fig. 7C of the application was contained in the drawings but was not listed in the Brief Description of the Drawings in the specification.

Applicant has amended the Brief Description of the Drawings to be consistent with the figures. Specifically, lines 6-8 on page 7 were amended to read: "Figs. 7A through 7C provide a successive series of sub-images corresponding to adjoining regions as pulses of radiation are generated during relative displacement."

Applicant asserts that the inconsistency between the drawings and the specification has been corrected and respectfully requests that publication of the patent based on this application proceed. In the case that any issues regarding this matter can be resolved expeditiously via a telephone conversation, Applicant invites the Examiner to call Terry McHugh at (650) 969-8458.

Respectfully submitted,

Terry McHugh  
Reg. No. 33,261
